What's the difference between a roof window and a skylight?

Model TPS top-hung roof window

Model VS ventilating skylight

The difference is very straightforward. A roof window opens and pivots so both glass surfaces can be cleaned from inside. A skylight does not pivot for cleaning. Of course, there is a difference in quality and value among manufacturers. But, a simple comparison of features, quality and price will show you why VELUX, with 44 years of experience and craftsmanship, is the world leader.

In addition to our four distinctive models, VELUX provides precision-engineered prefabricated

flashings to make installation easy and weathertight. We also offer quick delivery and a full range of optional accessories and glazing.

To learn more about the difference and the possibilities, write for our free 24-page full-color brochure, "The Complete Guide to Roof Windows and Skylights."

VELUX®

The world leader in roof windows and skylights.

Mail this coupon. We'll send you a free copy of "The Complete Guide to Roof Windows and Skylights" and a price list within 24 hours.

THE WISCONSIN ARCHITECT, serving the construction industry in Wisconsin with circulation to Architects, Engineers, General Contractors, Business and Interior Designers, Landscape Architects, Certified Planners, Developers, Specifiers, Construction Managers, Builders, Manufacturers, Suppliers.

Build in efficiency... with natural gas

Natural gas. It's clean and non-polluting. It's economical. It's more efficient than ever, thanks to today's technologically advanced heating systems. And prices are stabilizing. That means natural gas will continue to be America's best heating value, today—and in the future as well.

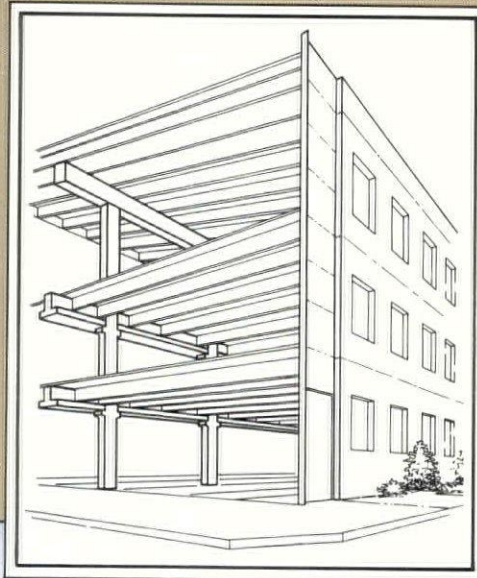

Your Wisconsin Power & Light representative will be happy to answer questions about natural gas pricing and supply, as well as building efficiency. Just call your local WP&L office.

Wisconsin Power & Light Company

MORE THAN MEETS THE EYE

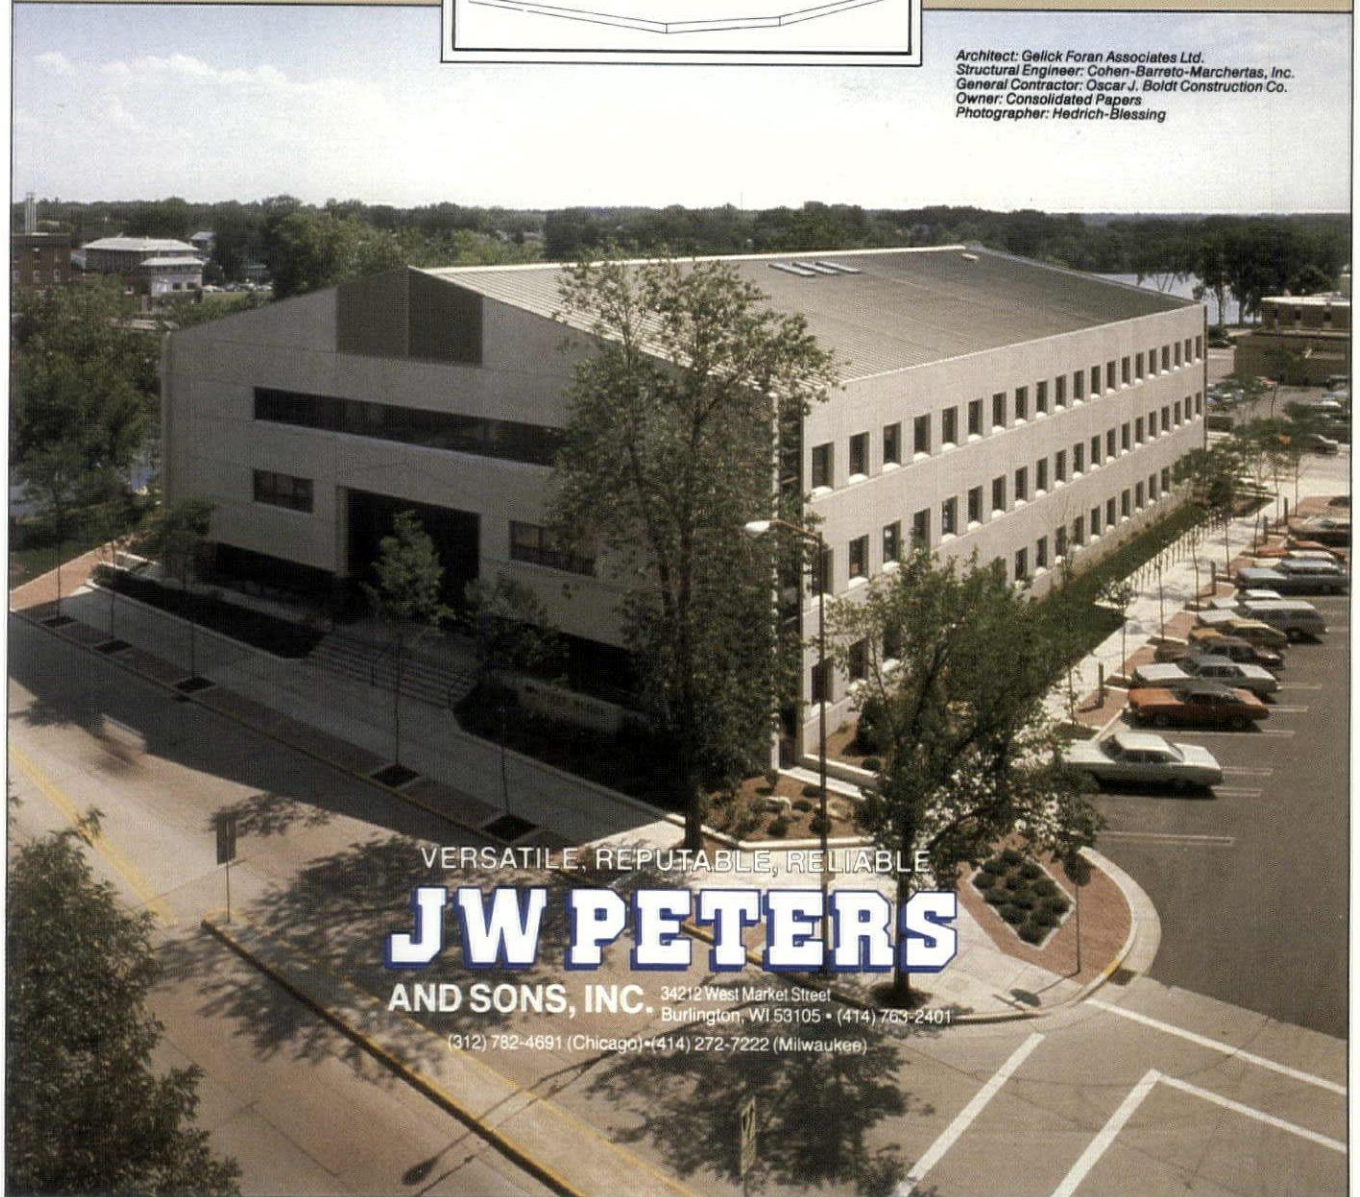

A totally precast/pre-stressed concrete frame building is more than aesthetically pleasing. Eliminating perimeter beams and columns, vertical architectural wall panels become exterior load-bearing members. The results: significant energy efficiencies and a fast-track building schedule.

If desired, horizontal load-bearing spandrel panels can be combined with ribbon windows.

J. W. Peters has fabricated several structures cited by national design awards. Your project could be next. *P.C.I. National Award Jury:* "From a space, column and leasing standpoint, the building is optimal."

*Architect: Gelick Foran Associates Ltd.
Structural Engineer: Cohen-Barreto-Marchertas, Inc.
General Contractor: Oscar J. Boldt Construction Co.

Membership Information

REGULAR MEMBERS are architects who are legal residents of and have been licensed or registered by any state, the District of Columbia or any U.S. Territory.

ASSOCIATE MEMBERS are persons who are legal residents of Wisconsin and are employed in a professional or technical capacity under the supervision of a licensed architect directly related to the practice of architecture, or are employed in circumstances recognized by licensing boards as constituting credits towards architectural licensing.

PROFESSIONAL AFFILIATES (State members only) are non-architects, registered to practice their professions where such requirements exist with established professional reputations. Professional Affiliates may include engineers, planners, landscape architects, sculptors, muralist and other artists, professionals in government, education, industry, research, and journalism, and other professionals whose work is related to the practice of architecture.

STUDENT AFFILIATE (State members only) are undergraduate or post-graduate students of architectural schools or secondary school students within the territory of the WSA.

DUES STRUCTURE

*1st year AIA member pays 40% of listed amount
2nd year AIA member pays 75% of listed amount
3rd year or more AIA member pays total amount

SUPPLEMENTAL DUES NOTES

The AIA Regular Member is also responsible to the Institute for supplemental dues beginning on January 1 of the year following admission based upon the number of registered architects in the firm (both employees and employers as of January 2) at the rate of \$170.00 each. The firm will be given a credit of \$100.00 against its supplemental dues obligation for each such registered architect who is an AIA member.

Invoices for national and state, dues will be mailed in December.

Members who have not paid WSA dues by July 31 shall be in default and shall be so notified. Members still in default as of September 31 shall be terminated.

Construction Industry Handbook

Wisconsin Society of Architects
Sixth Edition, February 1986

The WSA Construction Industry Handbook is published as the February issue of The Wisconsin Architect as a reference handbook for all readers on matters pertaining to the Wisconsin Society of Architects.

The circulation of the Handbook is to all members of the Wisconsin Society of Architects of the American Institute of Architects (WSA). Additionally, copies

of the Handbook have been sent to members of the Associated General Contractors, consulting engineers, interior designers, landscape architects, and many other individuals involved in the design and construction industries.

Your comments and suggestions are appreciated with reference to other individuals or organizations that should receive copies of this Handbook next

year, as well as revisions or changes in content that you feel are appropriate.

One last word. Please continue to refer to the advertising portion of the Handbook when looking for products or services. Without this support the Wisconsin Architect and this Handbook would not be possible.

Smoke kills

Stop deadly smoke
infiltration
with PENSIL™ 851.

UL recognized PENSIL™ 851 is the silicone foam penetration firestop system you can count on when it *really* counts. Proven by industry standard tests to provide superior fire and smoke containment properties, General Electric PENSIL 851 fills and seals tight in all cable, pipe and conduit openings through structural walls and floors . . . resisting potentially deadly fire, smoke and fume penetration.

Easy to use • Low system cost.

PENSIL 851 application, with the approved ceramic fiber backing material, is fast, simple and inexpensive. Just rough-cut the backing material and suspend it in place, pour in the PENSIL 851 mixture . . . and you're done! PENSIL 851 flows easily in and around even the most complex structures, then expands and cures in place immediately for an air- and moisture-tight seal. Total cost compared to competitive firestop systems is minimal, and the quick installation time can cut your labor costs as well.

*PENSIL 851
is easy to use
and performance-proven—recognized in industry
standard tests UL 1479, ASTM E 119, IEE 634.*

You can count on it. And you can count on us.

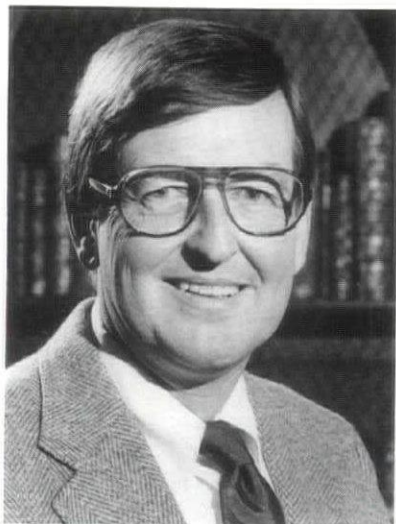

When you make us your GE Silicone supplier, you can count on on-time delivery, expert technical assistance, and assured supply of the most complete line of sealants in the construction industry from our in-depth inventory. So you get the job done right, on-time and on-budget . . . the first time . . . every time.

For more information about PENSIL 851 and the complete line of GE Silicone Construction Sealants, call or write today.

President's Message

The Wisconsin Society of Architects, **your organization**, continues to be one of the strongest and most respected components of the American Institute of Architects. We are on the cutting edge of many of the issues confronting the architectural profession across the country - qualification based selection of design professionals, legislative remedies to the liability insurance crisis, and the creation of standards for asbestos abatement in buildings. We are gaining strength in numbers, our membership increased by more than 10% in 1985 to 802. We are financially sound despite the fact that dues have remained the same for more than 10 years.

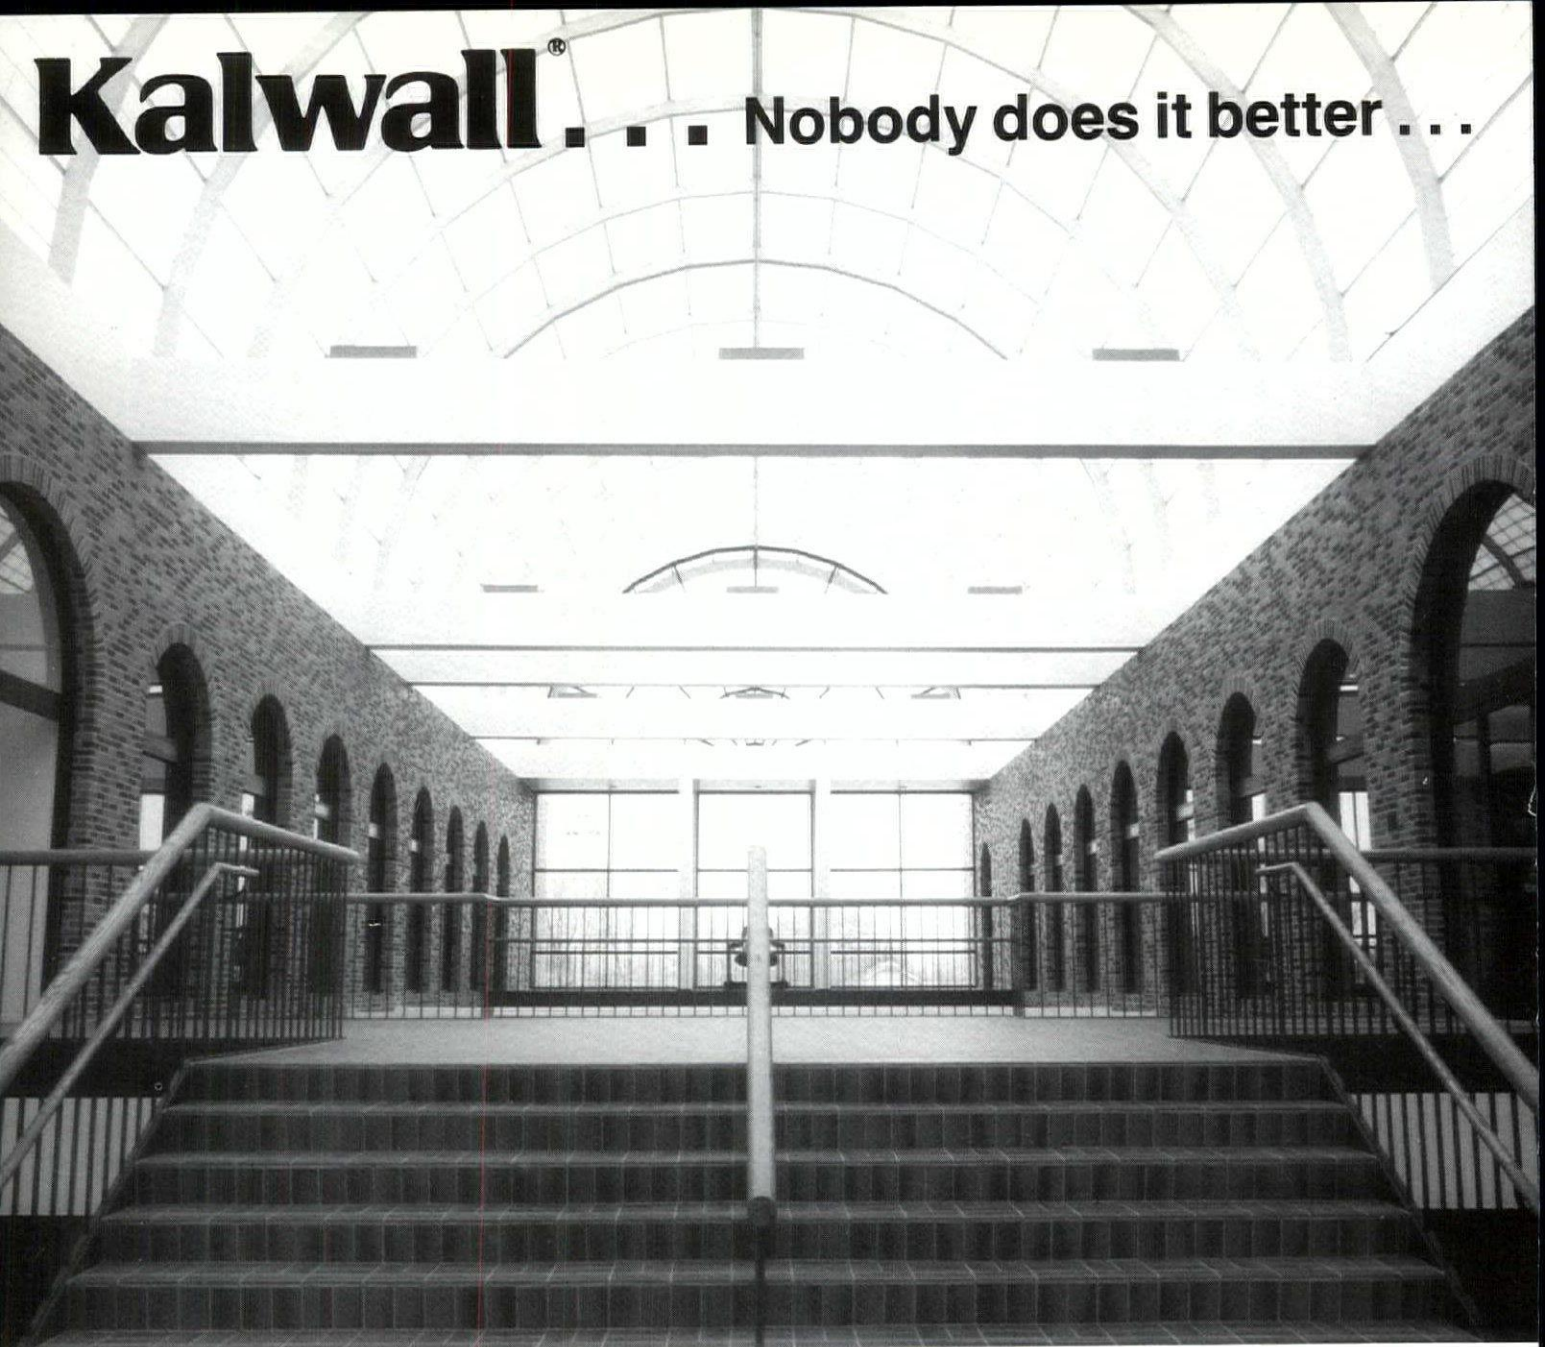

As we implement the mission of the WSA in our 75th anniversary of 1986, your WSA officers will be taking a long-range look at our programs, services, and finances so that as a society we can continue our leadership position and financial strength into the 1990s. We must strive to broaden public awareness of the built environment and of the architects who shape that environment. We must continue to serve our public in a meaningful way. We must not shirk our respon-

sibility in this litigious society - on the contrary, we must assert ourselves more than ever before. As architects, we must increase our leadership role in the design and construction process. We must be willing to accept responsibility in providing services in order to increase our value in the eyes and pocketbooks of our clients. The more valuable we are to our clients, the less likely it is that the fee will be the most important criterion in the selection process. We are essentially a volunteer organization that relies on the willingness of individuals to donate their time and energy. We can continue to achieve our goals and serve the profession only with your help.

On behalf of the WSA Board of Directors and Officers, I ask for your continued support and assistance throughout 1986. ■

James W. Miller, AIA
President
Wisconsin Society of Architects
American Institute of Architects

Kalwall® . . . Nobody does it better . . .

. . . and we prove it every day. Kalwall/Structures Unlimited skylights, curtainwalls and window systems are the most cost effective at bid time and ESPECIALLY over the life of the building! Kalwall controls heat gains and heat losses better than any other system on the market today! Let's face facts:

- Fact: Best U Factors (.40, .24, .15) R Values = 2.5, 4.16, 6.67)
- Fact: HVAC Load Reduction — Shading Coefficients Down to a .16!
- Fact: Unlimited Size and Areas with Class "A" U.L. Roof Systems
- Fact: Save on Support Structure — Kalwall Dead Load is 2.5 psf
- Fact: Design Flexibility — Kal-Curve or Standard Roof and Walls
- Fact: Maintenance Free — No Skylight or Window Cleaning
- Fact: Proven in over 30 years of Architectural Award Winning Buildings

NBS, Inc. provides complete design-engineering and budget assistance through conceptals to working drawings for the most cost effective designs. Kalwall is our major system. We've been installing Kalwall systems for hundreds of satisfied architects and owners in Wisconsin-Michigan since 1977. For complete quality assurance and responsibility, nobody does it better!

THE BOLD LOOK
OF **KOHLER**

The Thunder™ Grey of a rainstorm. The Tender™ Grey of dawn. Two beautiful new greys from Kohler. Let them bring strength or delicacy to your bath or powder room. To find out where and how, see the Yellow Pages for the local Kohler Showroom in your area, or send \$2 to Kohler Co., Dept. AH0, Kohler, Wisconsin 53044.

"ASBESTOS - WHAT ASBESTOS???"

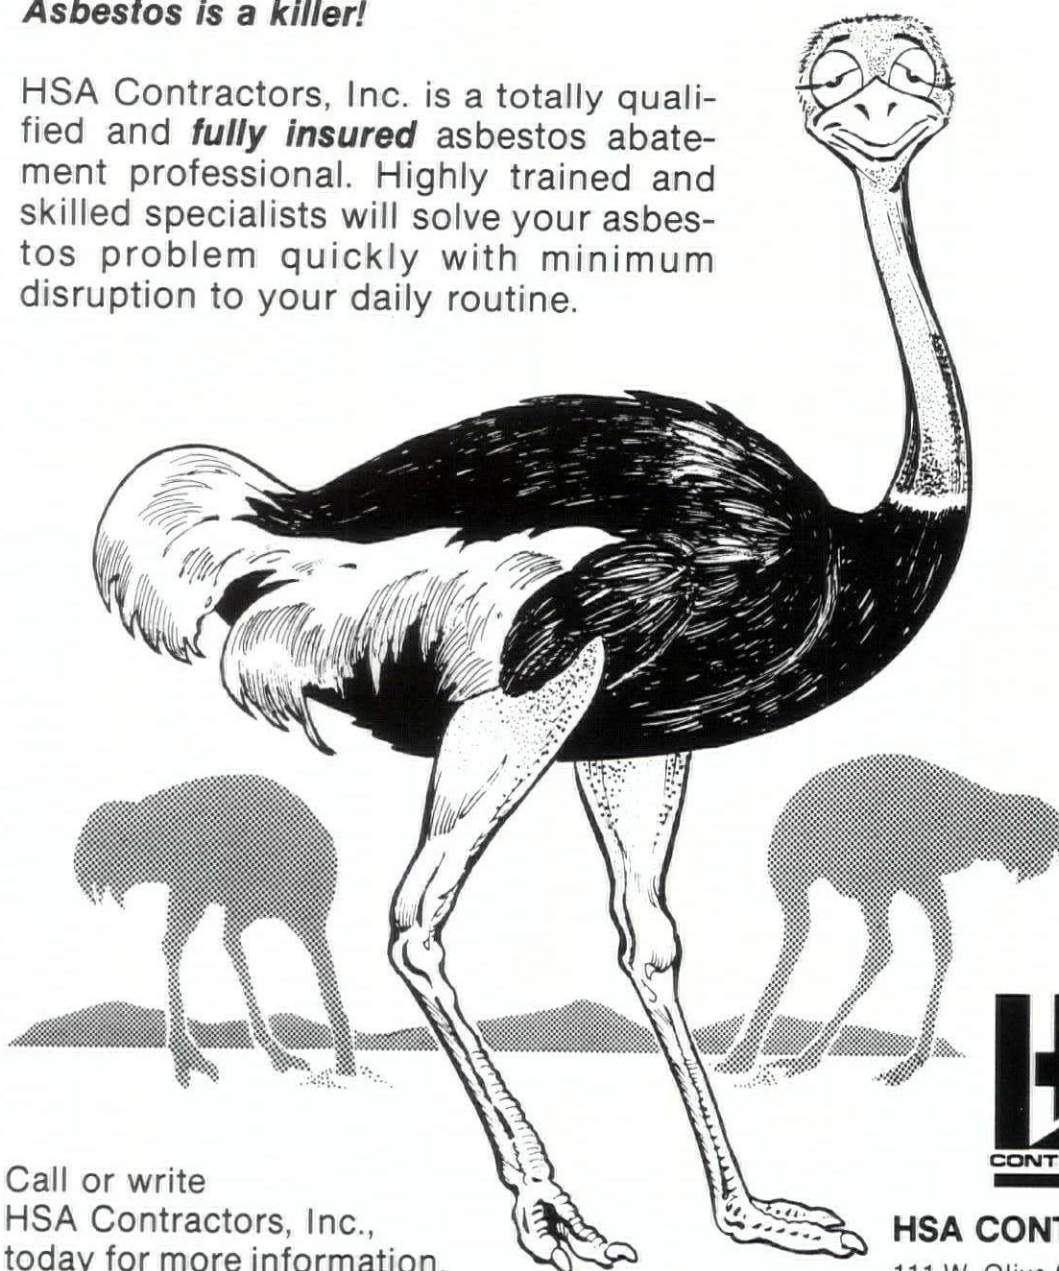

Why face danger — Stick your head in the sand!

It's called the Ostrich Syndrome.

If your plant, hospital, or building has asbestos, it's not going to disappear — it must be removed! The longer you wait, the greater your liability.

Asbestos is a killer!

HSA Contractors, Inc. is a totally qualified and **fully insured** asbestos abatement professional. Highly trained and skilled specialists will solve your asbestos problem quickly with minimum disruption to your daily routine.

Call or write
HSA Contractors, Inc.,
today for more information.
You'll breathe easier.

Wisconsin architects in recent years have won many important awards and commissions across the nation. They have also served thousands of clients, large and small, throughout Wisconsin and the Upper Midwest with skill and dedication. If you need the services of a highly qual-

ified architectural firm, you will find a suitable one in this Directory. Or if you aren't sure you need an architect, any of the firms listed herein will welcome the opportunity to meet with you to provide professional advice and recommendations.

James W. Miller, AIA, President
Wisconsin Society of Architects
American Institute of Architects

EXCELLENCE IN MASONRY

ARCHITECT: BHS Architects, Inc.

PROJECT: Aronson-Schroeder Office Building
Fox Point, Wisconsin

Sponsored by:

MASONRY INSTITUTE OF WISCONSIN, INC.

8989 North Deerwood Drive, Milwaukee, WI 53223

(414) 355-7800

Clarence Huettenrauch AIA/CSI
Peter J. Schuyler AIA

Masonry Institute of Wisconsin
8989 North Deerwood Drive
Milwaukee, Wisconsin 53223

Gentlemen:

The design for the new Aronson-Schroeder Office Building is a direct response to the client's desire to have a building which made a strong architectural statement and yet respected the buildings around it. The site for the Project is located on a busy commercial street. The neighbor to one side is a church and to the other is a school.

Masonry was the logical choice for the primary material on the building. The brick selected was compatible with that on the two adjacent buildings. It also gave the client, who occupies about one half of the space, the strong image and low maintenance he wanted.

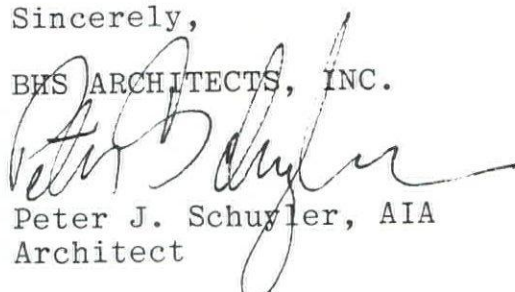

The same masonry used on the exterior was carried into the two-story lobby/atrium. The entrance to the building was emphasized by the arch and circular window, both of which were easily and logically executed in masonry.

While many other office buildings in the area have high vacancy rates, this building was fully occupied almost immediately. The client attributes much of that success to the design of the building.

We join the client in expressing our appreciation to the Masonry Institute of Wisconsin for selecting this building to receive an "Excellence of Masonry" award.

Sincerely,

BHS ARCHITECTS, INC.

Peter J. Schuyler, AIA

SAVE THIS AD NOW. IT COULD SAVE YOUR LIFE LATER.

 Digging near underground power lines and other utilities can be deadly. Before you dig, uncover the facts. If you are digging in Wisconsin call Diggers Hotline at least 3 days before digging.

1-800-242-8511

In Wisconsin

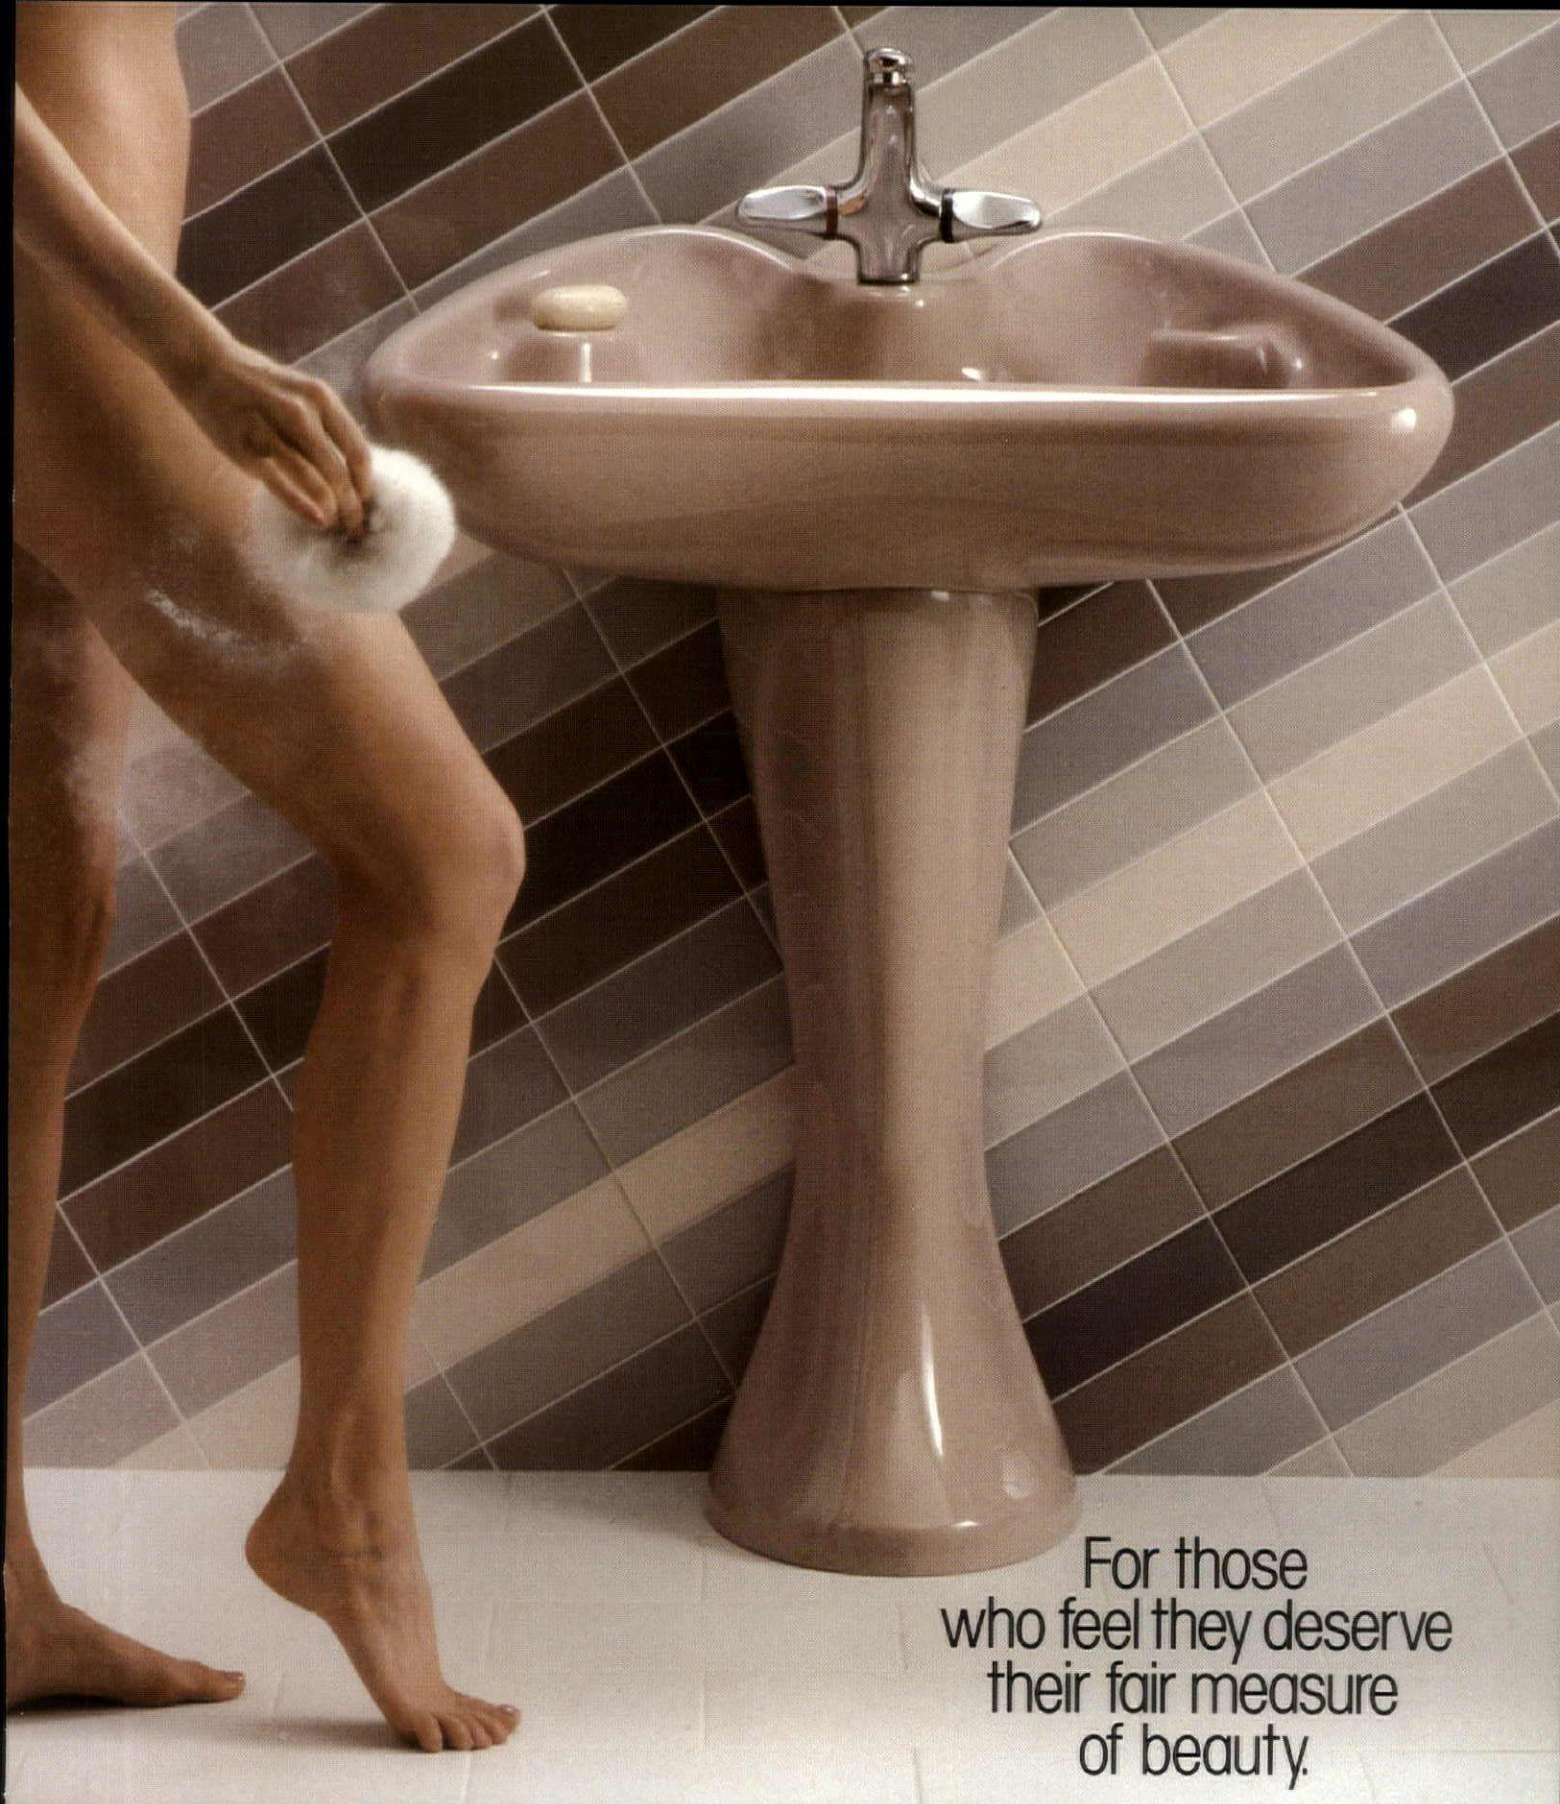

344-5111

Milwaukee Area

State law requires you to notify owners and operators of underground facilities at least three working days before you dig. One call to Diggers Hotline alerts most major Wisconsin utilities. If there are utility lines under the site you specify, the company will mark their exact locations for you.

Save this ad. It's one you can live with.

The GYP-CRETE S-I Factor:

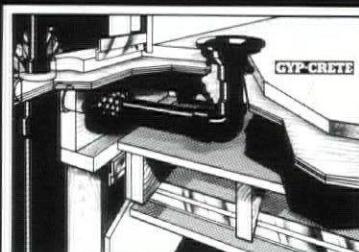

||| Sound = \$ound Insulation Investment

Gyp-Crete Floor Underlayment enhances any wood-frame floor/ceiling assembly by adding one more sound control component to the system. Today's buyers demand more privacy, more quality than ever before. Minimal STC-rated assemblies are no longer satisfactory.

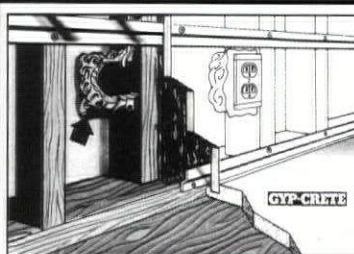

GYP-CRETE's S-I FACTOR for BETTER LIVING. The BETTER IDEA! Obtain perimeter seal, no cracking, fire & smoke control, suitable with all finished floor goods.

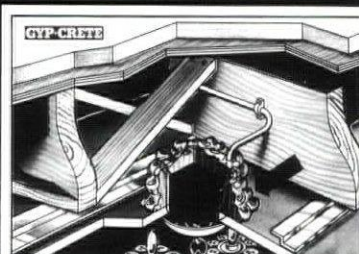

Opening under tub, shower drain and trap cavity must be caulked to prevent impact and conductive noise transmission.

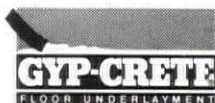

Caulking should seal the toilet drain pipe and plumbing "tree." Note preferred double-ceiling construction for bath areas.

Outlets should be staggered in stud partitions and any opening in and around box sealed with caulking.

Recessed light fixtures and stereo speakers should be sealed tight with any direct opening properly caulked against noise paths.

WSA-AIA State Organization

The Wisconsin Society of Architects of the American Institute of Architects (WSA) with over 800 members is the state component of the national organization representing architects and related professionals in the state of Wisconsin. Members from private firms, corporations, industry, government, and education join together to maintain and represent excellence in architecture, the profession and to the public. This is accomplished through the many programs the WSA offers its members.

WSA membership offers many different opportunities for education and career development. The WSA is striving to help in advancing each individual's architectural skills, professional understanding and career opportunities.

With offices located in Madison, WSA is directed by Board of Directors which sets priorities of the organization and initiates new programs. The Board of Directors consists of 20 representatives from the state's four local chapters. The president and vice-president of each chapter automatically are members of the Board. Five Directors-At-Large are elected by the state membership from the local chapters through an at-large election. An Associate member and two students also serve on the Board. The four primary officers compose

an Executive Committee which is selected by the Board of Directors itself — from the membership roster of the WSA.

There are in excess of 45 standing commissions, committees, and short-term task force which recommend and execute policies, plans and produce programs. Membership on these state groups is drawn from the WSA membership.

When professional architectural expertise is needed by national, state, or local government bodies, members are nominated from the WSA to serve on such committees.

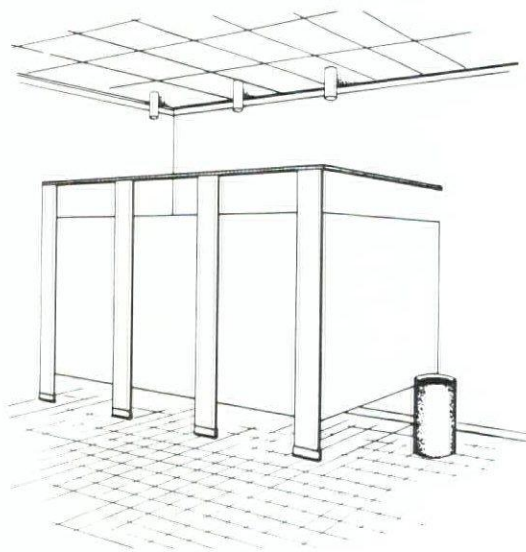

A full time staff headed by an Executive Director, located in Madison, handles day to day operations and is available to all Wisconsin members as a liaison to the AIA and as an information center.

The WSA is composed of four chapters, each having its own Executive Committee and accompanying committees and programs pertinent to its part of Wisconsin and its communities. Emphasis of the chapters is on participation and special events tailored to their needs through local meetings and seminars. All members have the opportunity to affect the direction of their profession and produce progress in many areas.

WSA Executive Office

1. **Eric Englund.** Executive Director. Manages WSA office. Implements policies of the Board of Directors. Responsible for maintaining operations within budget set by the Board. Coordinates committee activities. Lobbyist. Edits all publications of the Society, including Wisconsin Architect, Hotline and other materials. Coordinates convention activities. Acts as liaison with State Government, and the legislature, all groups in the Construction Industry, the AIA, and the news media.

2. **Karen Linley.** Executive Secretary. Assistant to the Executive Director. Manages all financial records and accounts of WSA. Dues collection. Assists as needed with convention planning and implementation, fall workshop, other special events. Membership secretary. In charge of master information records. Schedules all mailings.

3. **Sandra Swatek.** Secretary to the Executive Director and Girl Friday. In charge of inventorying, purchasing, selling, billing and mailing of all AIA documents and codes. Processes Newsletters, Addenda and all Executive Director's Correspondence. Handles employment service, library and multiple miscellaneous problems.

4. **Nancy Baxter.** Advertising Director for the WISCONSIN ARCHITECT. Coordinates all advertising sales, subscription sales, and other matters pertaining to the income for the WISCONSIN ARCHITECT. Educates WSA members and advertisers regarding the value of advertising in the WISCONSIN ARCHITECT.

Architects usually call the WSA office with questions on ethics, documents, application for license in another state, renewal of license, supplemental dues, questions on insurance, etc. And we're always on the phone helping someone to locate a job in an architectural office, or assisting an architect in finding someone to fill a vacancy.

A great many calls come in from all segments of the construction industry and legal profession inquiring about codes, documents and legislation.

Innumerable calls are received from the general public — prospective clients in need of architectural services seeking guidelines as to how to go about retaining an architect. What do they do? and

What do they charge? are the most frequent questions asked by the unsophisticated callers.

While the great majority of calls formerly came from individuals seeking architectural services on a very small scale (a residence, an addition to an existing building), more and more calls are now being received from prospective clients with considerably larger projects in mind, i.e., a library, an educational building, a municipal complex. We use all of these instances as opportunities to educate the public on the true nature and value of architectural services, advising them on the best method of selection, etc.

No matter what the need — call us. We'll do our best to fill it.

Benefits of Membership in WSA

1. **Work.** Whether you are an employee or an employer, WSA helps you get work by means of job listing, referral, "how to" seminars and cassettes, etc.
2. **Marketing Information.** You get no place without this today. WSA organizes seminars, makes available printed material, cassettes, inserts information in the Wisconsin Architect.
3. **First Hand News** affecting the practice of architecture by means of committee reports, Hotline, Wisconsin Architect, etc.
4. **State Agencies' Contracts** are updated with the help of WSA representation. Some past inequities have been corrected.
5. **AE Selection** by means of bids is an invitation to disaster. You know it. Does your prospective client know it? Get the background and current information on this development.
6. **Insurance Rates.** Maybe your premium or your exposure can be reduced. WSA has committees working on this, information and advice to give you.
7. **An Eye On Legislation** affecting zoning, planning, professional registration, taxes, procurement of services and other matters of interest to the profession and the construction industry.
8. **Legislative Relief.** WSA has an active legislative committee and minuted program.
9. **An Eye On Building Codes.** Committees have been working at state and national levels to improve regulations affecting buildings.
10. **Continuing Education** programs on all of the timely subjects, like marketing, energy conservation, production efficiency, etc.
11. **Library** of architectural books is available on loan at no charge. Cassettes and slides on a wide range of important subjects are available at no charge.
12. **Exchange Of Ideas, Exploration** of mutual technical and professional problems at local and state meetings.
13. **Learning By Association** with other architects and distinguished non-architect guests. Every person you talk to at local or state meetings is an expert on something.
14. **You Become Part Of** effort to maintain and improve high ethical and technical standards. For instance, a lot of discussion is taking place now on the new revision of the AIA Standards of Professional Practice (the "Code of Ethics"). Why don't you get in on this?
15. **A Forum** for presentation of viewpoints. You play a part in establishing the standards of the profession by expressing your opinion at local and state meetings.
16. **Participation On Committees.** You can be on a local, state or national committee almost for the asking. This could be very broadening and very instructive.
17. **Common Front** presented on issues important to the profession. Witness WSA activity against competitive bidding.
18. **Contract Forms** and other documents. These are sold by WSA to members — with same-day service. WSA members pay a discounted price for documents.
19. **Hotline** and other communications which keep members up to date on numerous important matters. For instance, a synopsis of senate and assembly bills which are of interest to us are included after a review by a committee and attorney.
20. **The Wisconsin Society of Architects, Construction Industry Handbook,** issued yearly, is a reference for valuable information not found elsewhere. Look through the latest issue and discover its great value.
21. **Public Relations** program in Wisconsin newspapers and our own magazine, The WISCONSIN ARCHITECT, distributed to important people outside the profession. This educates the public, upholds the image of the architect.
22. **Status And Prestige** enhanced by membership in local chapter, WSA and AIA. This translates into personal satisfaction and better respect by the community.
23. **Information Service** on such professional matters as state laws (proposed and enacted), document forms, state administrative structure, licensing, sources for other needed information.
24. **Job Bank,** for employees searching for employers and vice versa.
25. **Honor Awards** program at both the State and Chapter levels which provide peer recognition, as well as local, state and national publicity to winners.
26. **WATS Line** - A toll free phone number to be used in contacting the WSA office.
27. **DILHR Plan Delivery** - The WSA staff will hand carry your plans to DILHR, pick them up, and return them to you for a nominal fee.
28. **Workmans Compensation Insurance** - WSA members can participate in a group plan which will return a dividend.
29. **Agenda's** of the Division of State Facilities Management are available in order that members can keep track of developing state jobs.
30. **Video Cassettes** are available for use in your office on a variety of topics including fees, project management, project scheduling, and the legal system.
31. **Intern Development Program** is a methodology for individuals pursuing architectural registration to obtain experience in all areas required for registration. WSA members are active in this program . . . both employers and employees.
32. **Young Practitioners Seminars** are a chance for young practitioners to come together to discuss a variety of topics of particular interest to them.
33. **Professional Competence** is mandated by state laws and the Department of Regulation and Licensing. The WSA office actively pursues cases where there have been allegations of actions which are not in compliance with those rules and regulations.
34. **An Office Away From Home** is available at the WSA office. Parking, library, phone, walking access to state agencies and the state capitol is all available.
35. **Group Health Insurance** is available to WSA members through a very competitively priced national policy.

Start with **PRECISION** finish with confidence

At Precision Metals, we make custom hollow metal and that is all we make. New construction or problem restoration project, Precision Metals has the necessary expertise, developed through specialization, to turn your most difficult specifications into the finest hollow metal available. You can be confident of that.

- ☐ Engineering consultation ☐ Complete shop drawings
- ☐ Finishes: PVC, Iron Zinc alloy, Prime painted cold rolled steel, Stainless steel
- ☐ Delivery via Precision trucks

From Fortune 500 companies to the stripes on the Super Bowl field

Mautz Paint is the choice for both highly distinctive and artistic buildings and for places where paint has to stand up to all kinds of abuse.

Compare the ingredients with other well known brands and you'll soon discover that all paints are not created equal. Check this list of Mautz users. You'll find you're in good company when you spec Mautz.

IMPORTANT NOTICE

FREE COMPUTER DESIGN SERVICE FOR MASONRY WALLS

THE WISCONSIN CONCRETE & PRODUCTS ASSOCIATION IS OFFERING A NEW SERVICE WHICH WILL ANALYZE OR DESIGN MASONRY WALLS FOR LOW, MID OR HIGH RISE BUILDINGS. THIS SERVICE IS OFFERED FREE TO DESIGN PROFESSIONALS—ARCHITECTS AND ENGINEERS—IN THE STATE OF WISCONSIN.

DATA PROVIDED: The program will check resisting moments limited by steel stress, masonry stress and deflection of the wall. It also checks shearing resistance limited by shear stress and bond strength and checks flexural compressive stresses, both allowable and actual. Once the stresses have been determined, the programs will check various masonry configurations to arrive at the configuration which would be the most economical construction.

Wisconsin Architects Foundation

Building A Better Wisconsin Through Architectural Education

The Wisconsin Architects Foundation (WAF) was created in 1954 for the purpose of supporting Architectural Education in Wisconsin, principally through scholarships and grants. To date, over \$100,000 has been distributed to 150 students.

In recent years, the WAF contributions to Scholarships have been exclusively to UW - Milwaukee students. With greater financial resources, the WAF would be able to support Wisconsin students at other institutions as well as offering grants and prizes for programs that relate to the improvement of the practice and profession of Architecture in Wisconsin.

The advertisement pictured on this page will be appearing monthly in the Wisconsin Architect. The members of the WAF encourage your contributions, either by way of annual member-

ship or donation to the endowment fund. Tax deductible contributions and membership are an act of participation in support of the strength and vitality of the Architectural Profession in Wisconsin.

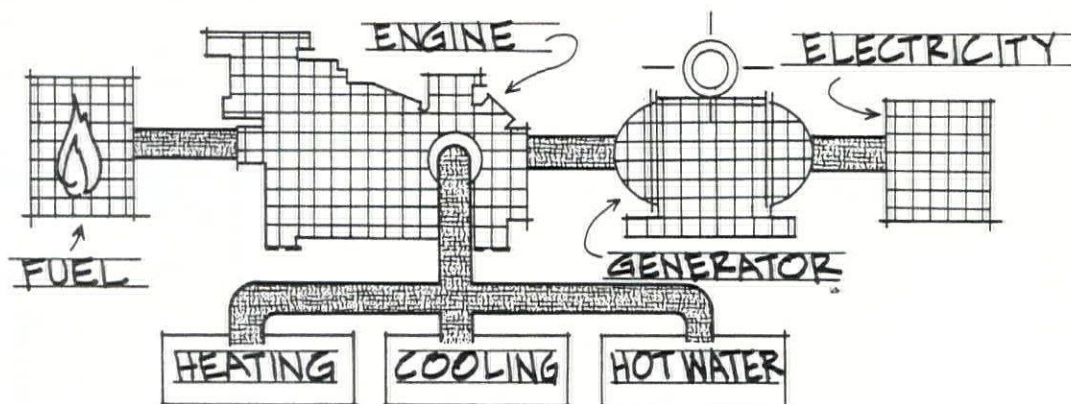

Within the next several months the WAF will contact all Wisconsin Architects, along with numerous other individuals and corporations who support and appreciate architecture. You can help by undertaking your annual membership and endowment donation to the WAF. You can additionally help by impressing upon those in related professions and industry of the vitality and benefits of the WAF.

For further information, contact current members of the WAF or our Executive Director, Eric Englund.

IMPROVE THE BOTTOM LINE....

....WITH GAS-FUELED COGENERATION.

Your client is a business person concerned with lowering the costs of business operations. Your design must address those needs. That's why architects who design facilities for energy efficient businesses put a lot of effort into recommending the right system for the project. . .

Every possible energy use must be identified. Energy to produce heat. Electricity. Steam. Cooling.

When all the alternatives have been considered, you may find that cogeneration is the answer. Cogeneration. A technology that can help squeeze the very most out of your client's energy dollars. Cogeneration is a way to solve all of your client's energy needs through the use of a single fuel source. . .low cost natural gas!

We have information to share regarding the feasibility of cogeneration systems. So when you're considering the alternatives, remember to call a Wisconsin Gas Industrial Gas Engineer.

Call us today at (414) 291-6990. Considering the abundant supply of inexpensive natural gas...can you afford not to?

A FOUR-LETTER WORD THAT YOUR MOTHER WOULD APPROVE OF:

“CARE!”

Mickey Hergenreder, WSA/AIA Senior Benefit Analyst

In an age where the word “caring” has often become more of a buzz word than a business philosophy, one of the most unique features of the WSA/AIA Group Plan for Firms is people who sincerely care about you, your employees, and their well being.

“Caring” is something that can’t be readily found, and at Association Administrators & Consultants, we feel that it’s the primary reason that we’ve become one of the nation’s top 100 brokerage firms in a little over a decade. It’s also the reason why we haven’t had success in hiring from the rest of the insurance industry, and why 95% of our administrative, benefit payment, and sales staffs’ only insurance training has been “in-house”.

For a complete listing of the AIA firms that we insure in Wisconsin, as our references, please call Kathy Birgen or Ken Hobbs at 1-800-854-0491 toll free. We want to prove it to you.

Public Telephones from Wisconsin Bell... An Important Human Consideration

An architect planning a modern building is faced with an overwhelming number of decisions. Federal, state and local codes must be met, energy efficiency strived for, and, above all, the human element considered. The wants and needs of the people who make a building their working "home" for some forty hours each week, as well as the convenience of others who visit the building daily, are considered in the early planning stages.

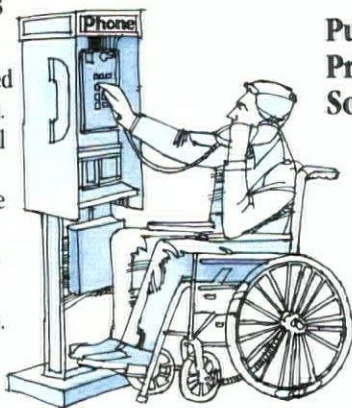

Public Telephones Provide A Service People Want, Need and Expect

Experienced architects call on many support resources early-on in each project. Wisconsin Bell has Public Communications Specialists ready to survey the public telephone needs based on a building's location and anticipated traffic flow. Together with the architect, Wisconsin Bell's specialists determine public phone locations that blend in with the structure's design and remain convenient to the building's tenants and visitors. Wisconsin Bell specialists also can point out other important details.

Convenient Phone Placement Considers Special Needs

Accommodating the disabled requires special consideration. Architects are aware of Federal mandates in this area, and Wisconsin Bell specialists have the resources to provide guidance in choosing barrier-free enclosures with correct heights of coin slots and dials.

Helpful Signage Points the Way

A simple, recognizable, identifiable sign calls the public's attention to the service they seek. Public telephones that people cannot find are little better than no phones at all.

Wisconsin Bell Public Communications Specialists point the architect's way to signage in harmony with the texture, material, color and design of the area.

Public Telephones Provide A Revenue Source Without A Downside

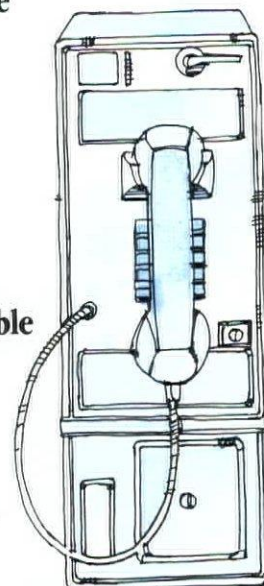

Commissions from public phone use can add up to an attractive sum. It's a revenue source without expenses. Because Wisconsin Bell owns the public telephones, they also install and maintain them.

Public Phone Planning Assistance Easily Available

Wisconsin Bell is ready to help building designers add the convenience and efficiency of public telephone service. Our Public Communications Specialists are qualified to provide the guidance needed to equip a building with this much needed and desired service.

Call Wisconsin Bell at 1-393-2772 TOLL-FREE*

*Only when dialed from another Wisconsin Bell customer telephone number.

The Functional Artform

An Arcways custom circular stair impacts its environs with uncompromising beauty and craftsmanship.

Specifying it is amazingly simple. Provide Arcways a blueprint with dimensional information. Arcways then follows the project to completion: from design, specifications, working drawings, and quotes...to complete delivery and supervised installation.

Arcways.
The Functional Artform.

expense of tearing off the old system. And the building's occupants may be subjected to less inconvenience during the reroofing operation because single-ply systems go up faster with less equipment.

Maintenance

Roofing has become such an expensive investment that every year of good roof performance is worth thousands of dollars to the building owner. Protecting this investment means hiring professionals to install and repair the system, and calling on those professionals to fix leaks, cracks and blisters before they cause extensive damage. It may also mean paying a small premium for a roof maintenance program featuring periodic roof inspections and repairs. With so much at stake, getting the most reliable roofing for the money and keeping the system in good condition should be a top priority.

The starting point in any maintenance or repair procedure is an understanding of the problem. Thousands of hours and millions of dollars are wasted each year because of failure to recognize just what is the problem. Roofs are coated that don't need recoating; flashings are replaced right alongside the hidden roof split that is the real problem; and roofs are replaced when windows are the actual source of the leaks.

Repair Or Replace

To find the actual leak source, a designer should examine the entire building. Three questions need to be answered: What is the problem?, What caused the problem?, and What is the solution to the problem? This process is greatly simplified when the designer has access to building plans, specifications and building inspection logs, allowing him to trace the history of the building and the roof.

Maintenance repairs are those required by performing roof systems for prolonged life. Some roofs require replacement, and any attempt to prolong life probably will be economically disastrous. The cost of maintenance repairs should always be weighed against the cost of replacement, the anticipated added life and risk factors.

The economic factors can be weighed by comparing the cost of repairs and the expected life of the repaired system to the cost of replacement and the expected life of the new system.

Owners should always be aware that the replacement cost generally includes upgrading the roof system — adding insulation, for example. These costs as well as interest costs, which can be factored, should be a part of the total economic picture.

Infrared And Nuclear Detection

If an owner is using infrared or nuclear scans to monitor roof performance, he should log the test results. The first scan should be done shortly after the roof is installed to provide a data base. Subsequent scans, performed every two years, can provide a track record of roof performance, pinpoint problems as they occur and eliminate major repairs.

In my opinion, infrared or nuclear non-destructive testing does not replace a trained observer making a visual inspection.

Nevertheless, nuclear and infrared tests can provide data and remove subjective factors in the inspection.

Alternative Roofing

Alternative roofing systems are gaining small but loyal followers of their own. Metal roofs attract many with dramatic lines and durability, while foam and cold-applied sys-

tems offer ease of installation. There may be times when the peculiarities of a particular job will require the unique characteristics of an alternative system.

Metal Roofing

Metal roofs can add a dramatic accent to almost any building. But that's not the only reason metal is being used on more and more new and reroofing jobs these days. Architects, specifiers and contractors are also using metal on buildings to increase durability and reduce maintenance costs.

Over the years, craftspeople have devised many different sheet metals, coatings and roof systems to protect and enhance their buildings. Copper, lead, zinc, aluminum and steel have all been pressed into service as roofing material. And systems such as the standing seam roof have been fabricated to foil the threats of time and weather.

Most of the metals and methods developed in the past are still in use today, while modern technology has resulted in improvements and additions to the line-up.

With the look of metal roofing becoming popular, more and more metal roof systems are being used on reroofing jobs as well as new construction. In many cases the support system provides the necessary pitch to avoid standing water on the metal panels.

Each of these roof systems, whether ancient or modern, has its own characteristics. Color, texture and shadow line contribute to each system's distinct personality.

Cold Applied Roof System

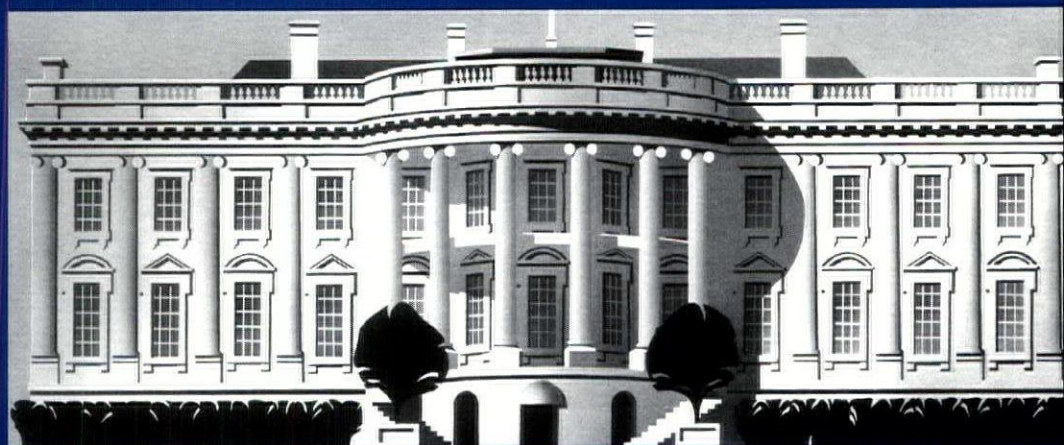

A cold applied roof system's principal waterproofing agent is applied in a liquid form at ambient temperatures. The waterproofing agent
